

# Tetrahydro Ionol

Ref Synarome : **085830**

CAS Number : 4361-23-3

## TECHNICAL DATA

**Appearance** : pale yellow liquid

**Flash point** : > 110°C

**Purity** : > 73% (sum of isomer)

**Chemical name** : 4-(2,2,6-trimethylcyclohexyl)butan-2-ol

**Chemical Formula** : C<sub>13</sub>H<sub>26</sub>O

**Molecular weight** : 198.5

**Log P** : 4.82

## SUBSTANTIVITY

**Tenacity on blotter** : 2 weeks

## STABILITY

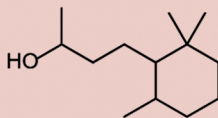

**VERY GOOD** ★★ ★

- Incense

**GOOD** ★★ ★

- Fine Fragrance
- Shampoo / Shower gel
- Cream
- Detergent
- Fabric softener

REGULATORY

## OLFACTIVE PROFILE

**Olfactive family**

Floral

**Odor description**

Tetrahydroionol has a rich violet note accompanied by woody and leathery tones.

**Suggested Usage**

0.5 to 5%

**Impact**

It brings volume and diffusion to floral, woody, spicy and oriental compositions.

**Great combinations**

It blends well with mimosa, lily, woods, chypre and oud notes.

**Why we love it**

By its duality between floral and leather notes.

**CITRUS**

**ALDEHYDIC**

**AROMATIC**

**GREEN**
