

Anisyl Nitrile

Ref Synarome : 085475

CAS Number : 874-90-8

TECHNICAL DATA

Appearance : white, brown &/or grey crystals

Flash point : > 110°C

Vapor pressure (20°C) : 0.00488 mmHg

Chemical name : benzonitrile, 4-methoxy

Chemical Formula : C₈H₇NO

Molecular weight : 133.5

Log P : 1.62

GC purity : > 98%

SUBSTANTIVITY

Tenacity on blotter : 1 month

Heavy duty liquid : good

Powder detergent : good

Fabric softener : good

STABILITY

VERY GOOD ★★★

- Cream

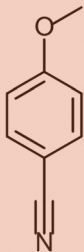

GOOD ★★★

- Fine fragrance
- Shampoo / Shower gel
- Soap
- Detergent
- Bleach
- Candle
- Incense

MODERATE ★★★

- Fabric softener

REGULATORY

OLFACTIVE PROFILE

Olfactive family
Ambery balsamic

Odor description
The mixture is powdery and musky with soft tonka bean note. An aniseed and almond heart is nuanced by earthy notes.

Suggested Usage
Up to 2%

Impact
It brings powerful powdery and musky aspects.

Great combinations
It blends well with floral, mimosa, heliotrope and all feminine notes.

Why we love it
It helps to replace tonka bean.
