

Ethyl Linolenate

Ref Synarome : 085960 CAS Number : 1191-41-9

Sourcing : France / Belgium
Process : esterification of linseed oil

TECHNICAL DATA

Appearance : colorless to pale yellow liquid
Flash point : > 110°C
Vapor pressure (20°C) : 2.8x10⁻⁵ mmHg

SUBSTANTIVITY

Tenacity on blotter : > 2 weeks

STABILITY

GOOD ★★★
- Fine fragrance

REGULATORY

BIODEGRADABILITY

RENEWABLE CARBON

OLFACTIVE PROFILE

Olfactive family
Floral

Odor description
An herbal green and balsamic note with spicy woody animalic undertones.

Suggested Usage
Up to 10%

+ Impact
It brings naturalness to compositions.

★ Great combinations
It blends well with bergamot, jasmine, animalic and chypre.

♥ Why we love it
Great in lentiscus and natural reconstitutions.
