

Heliotropin Diethyl Acetal

Ref Synarome : 085385

CAS Number : 40527-42-2

TECHNICAL DATA

Appearance : colorless to pale yellow liquid

Flash point : 105°C

Vapor pressure (20°C) : 0.000266 mmHg

Chemical name : 1,3-Benzodioxole,5-(diethoxymethyl-)

Chemical Formula : C₁₂H₁₆O₄

Molecular weight : 224.3

Log P : 2.48

GC purity : > 98 %

SUBSTANTIVITY

Tenacity on blotter : 1 day

Dry fabric : good

Wet fabric : good

STABILITY

GOOD ★★★

- Fine fragrance

- Shampoo / Shower gel

- Cream

- Soap

- Fabric softener

MODERATE ★★★

- Candle

- Incense

- Detergent

OLFACTIVE PROFILE

Olfactive family

Ambery balsamic

Odor description

A powerful, sweet floral note (lilac, freesia) with green, spicy, powdery and ambery undertones.

Suggested Usage

Up to 5%

Impact

In all perfumes, it gives a sweet floral note to the background, especially in lily of the valley and freesia.

Great combinations

It blends well with flowers, fruits, patchouli and vanilla notes.
